## MEDIA RELEASE

### **Allied Moulded Products, Inc. Introduces the 2302-ABKSC Adjustable Fiberglass Outlet Box, an EV Game Changer**

BRYAN, Ohio– Allied Moulded Products, Inc. is excited to announce the release of the 2302-ABKSC 2-gang follow up to the innovative 1099-AB Adjustable Fiberglass Outlet Box. This game changing product is UL listed and has a 2-hour wall fire rating, making it a safe and reliable choice for electrical installations.

The 2302-ABKSC is the only two gang adjustable outlet box in the industry that is made from Allied's patented fiberglass. This material provides unmatched strength and durability that will not warp or hourglass like plastic boxes, while also being lightweight and easy to handle. It also requires no putty or sound pad when maintaining 3" of horizontal separation and following your local building code. The box features industry leading internal volume at 42.5 in<sup>3</sup>, clamps that secure wiring for 120V or 220V power, and has the most travel distance for an adjustable box in the industry at 2" of travel, making it the perfect solution for varying thickness of drywall, plywood, backsplashes, stone, brick and more!

"Allied Moulded is always looking for opportunities to expand our product offerings in innovative ways," said Dustin Morr, Product Manager, "the 2302-ABKSC is one of those products that can not only be used in the innovative EV charging market but can also be used in your kitchen that is fitted with all the new large devices that demand the market leading cubic volume of this product."

The 2302-ABKSC Adjustable Fiberglass Outlet Box is proudly manufactured in the USA and is available for purchase now through Allied Moulded Products, Inc. For more information, please visit the company's website at [www.alliedmoulded.com](http://www.alliedmoulded.com) or call 1-800-722-2679.

#### **About Allied Moulded Products, Inc.**

Allied Moulded Products, Inc., established in 1958, is a leader in the production of fiberglass reinforced and polycarbonate, nonmetallic electrical boxes and enclosures, for use in residential and industrial applications globally. The Bryan, Ohio-based manufacturer today is perfecting material and design formulations that result in products with increased strength, reduced weight, corrosion resistance, non-conductivity, UV resistance and ease of installation.
